Supplemental Instruction (SI) was developed by Dr. Deanna Martin in 1973 at the University of Missouri at Kansas City. Supplemental Instruction (SI) is a non-remedial academic assistance program that provides regularly scheduled, out-of-class, peer-facilitated sessions designed to increase student performance and retention. The SI program targets historically difficult academic courses. Difficult courses are those that have a high rate of D or F grades, incompletes, and withdrawals. SI has three major purposes:

1. Increase retention within targeted historically difficult courses
2. Improve student grades in targeted historically difficult courses
3. Increase the graduation rates of students

Below is the list of Spring 2016 SI courses with the SI session times and locations.
